

Date of change	Description of change
Version: 1.0, January 2015	New file with Block trades data will be generated on daily bases.

Help on Format description available on email: XetraIT@ljse.si.

Details:

File name: **LJSE_DailyBlockTrades.csv**

Format description:

- Data in each line are separated with semicolon (;)
- The first line is a Header line and always exists
 - o The first field in the Header line is always Trading day in format DD.MM.YYYY.
 - o All other fields in Header line are names of fields which will be saved in the file in other data lines:
 - Example of Header line:

`05.12.2014;TradeTime;Ticket;Symbol;ISIN;Issuer;Volume;Price;Value;Interest`
- All other lines in the file represent block trades, each line represents one block trade. Data are as follows, in this order:
 - o TradeDate
 - o TradeTime
 - o Ticket
 - o Symbol
 - o ISIN
 - o Issuer
 - o Volume
 - o Price
 - o Value
 - o Interest
- If no block trades were done on a particular Trading day, only the Header line exists in the file
- Last field (Interest) can be NULL
