

Pursuant to Article 332 of the Markets in Financial Instruments Act and Article 34 of the Ljubljana Stock Exchange Inc. Articles of Association with the latest amendments dated 13 June 2019, the Ljubljana Stock Exchange Management Board adopted at its meeting on 16 September 2019 the following tariff or

LJUBLJANA STOCK EXCHANGE INC. MARKET DATA FEE SCHEDULE

1 Notes to the Market Data Fee Schedule

This Market Data Fee Schedule regulates the marketing of price data, reference price data and other market data that are generated, collected and stored by the Ljubljana Stock Exchange ("LJSE") for the purpose of transmission to data vendors ("vendors").

LJSE level 1 market data: include last traded prices with sizes, best bid and best ask prices with sizes, index values, and other data.

LJSE level 2 market data: include (at least) the ten best bid and best ask prices with sizes for predefined instruments, as available, and LJSE level 1 market data.

The LJSE level 1 market data service provides the information on stock trades and gives access to real-time market data on trades, best ask and bid, and other data. The LJSE level 2 market data service provides information on ask and bid as well as market depth; in addition to the information of LJSE level 1 market data, LJSE level 2 market data shows the market depth of ten best ask and bid prices with sizes.

LJSE last trade data: comprises of the prices and sizes of the last executed trades on the regulated market and SI ENTER market.

LJSE Monitor: portal, which enables the user to monitor the trading on the Zagreb and the Ljubljana Stock Exchange for the selected set of instruments in an advanced and real-time manner.

START Model: service offered through the LJSE Monitor, it enables monitoring of the exchange prices and the sizes of the best bids and asks for 20 selected financial instruments listed on the Ljubljana Stock Exchange.

START PLUS Model: service offered through the LJSE monitor, it enables monitoring of the exchange prices and the sizes of the best bids and asks for 20 selected financial instruments, listed on the Zagreb Stock Exchange or the Ljubljana Stock Exchange.

PRO Model: service offered through the LJSE monitor, it allows the monitoring of prices and sizes for five best bids and asks for 40 selected financial instruments listed on the Ljubljana Stock Exchange.

PRO PLUS Model: service offered through the LJSE monitor, it allows monitoring of prices and sizes for the five best bids and asks for 40 selected financial instruments listed on the Zagreb or Ljubljana Stock Exchange

MASTER Model: service offered through the LJSE monitor, it allows monitoring of prices and sizes for ten best bids and asks for unlimited (any) number of selected instruments listed on the Zagreb or Ljubljana Stock Exchange.

LJSE markets: pursuant to the Ljubljana Stock Exchange Rules LJSE markets consist of equity market, bond market, and market for structured products, as well as the MTF market - i.e. SI ENTER market.

End User: an individual who has permission to access or to use the Data. The End User may not forward or publish the Data in any way.

Non-professional user: a natural person who uses market data exclusively for private purposes, and does not act as a principal, body, partner, employee or customer of an investment firm nor does it act on behalf of another natural person or legal entity with the purpose of using market data.

Net End User: the unit of count for the End User is defined only if there are several authorizations for the use of the Data to the End User, based on the prior approval of the Vienna Stock Exchange and the Market Data Agreement between the End User and the Vienna Stock Exchange. It is used exclusively for the internal use of a Net End User for all the listed services and products in this price list. This eliminates multiple internal reporting by the same End User.

Subscription to some of these types of data is conditional upon the use of appropriate vendor technology.

The rights of vendors and subvendors to use and transmit market data are stipulated by the Market Data Agreement entered into between the LJSE and vendor or subvendor. The MDA grants vendors the right to access and use market data and grants subvendors the right to use market data, whereby vendors and subvendors shall themselves provide technology solutions for their customers to be able to access market data. Market data may be obtained directly from the LJSE only by vendors, while subvendors shall obtain market data from the vendor of their choice.
